

RAKSHITHA M

raxithamarthaje@gmail.com | +91 8431534803 | linkedin.com/in/rakshitha-marthaje | github.com/raxitha

PROFESSIONAL SUMMARY

Junior Software Engineer with hands-on experience in full-stack development, Flutter mobile apps, and production backend systems. Skilled in REST APIs, cloud infrastructure (AWS & DigitalOcean), and third-party integrations such as WhatsApp APIs, OTP authentication, and push notifications. Experienced in managing live deployments, optimizing backend performance, and contributing across frontend, backend, and infrastructure layers.

EDUCATION

MCA — NMAM Institute of Technology, Karkala | CGPA: 9.23 | 2023–2025

BCA — St Aloysius College, Mangalore | CGPA: 8.98 | 2021–2023

TECHNICAL SKILLS

Languages: Dart, Python, Java, PHP, JavaScript, HTML, CSS

Frameworks/Tools: Flutter, Laravel, Express.js, Flask, Git, Postman, Jira, Firebase Cloud Messaging (FCM)

Databases: MySQL, PostgreSQL, PL/SQL (Stored Procedures, Query Optimization)

Cloud & DevOps: AWS (Lambda, API Gateway, S3, CloudWatch, RDS, EC2), DigitalOcean, CI/CD concepts, Linux environment familiarity, Shell scripting

Mobile Development: Play Store deployment process, mobile authentication flows, push notification systems

PROFESSIONAL EXPERIENCE

Junior Software Engineer — Mobiezy

Oct 2025 – Present

- Built and deployed a production Flutter mobile application to the Play Store for real-time service workflow management.
- Designed and developed REST APIs using Node.js, Express, and MySQL with stored procedures to improve data performance.
- Migrated backend services from AWS to DigitalOcean, improving response speed and reducing infrastructure costs.
- Implemented WhatsApp API, SMS OTP authentication, and Firebase Cloud Messaging integrations for notifications.
- Handled deployment configuration, debugging, and production support across backend and mobile layers.

Associate Software Engineer — SilverTech Systems

Aug 2024 – Sep 2025

- Built core modules — Vendor, Inventory, Purchase Order, Project Cost Allocation, and User & Role Management — for a Vendor & Inventory Management Dashboard using Flutter, Node.js, and MySQL.
- Implemented vendor and inventory tracking with low-stock alerts, enabling admins to compare vendor price quotes and manage purchase orders end-to-end.
- Developed project-wise cost allocation logic to aggregate vendor payments and material usage.

PROJECTS

Ezyworx — Flutter, Node.js, MySQL | Mobiezy

- Developed a production-ready service workflow management system available as Flutter mobile and web apps; designed backend APIs, secure authentication, WhatsApp messaging, OTP login, push notifications, and AWS S3 storage; optimized database queries.

Vendor and Inventory Management Dashboad - Flutter, Node.js, MySQL | SilverTech Systems

- Built a dashboard for vendor comparison, real-time inventory tracking with low-stock alerts, purchase order management, project-wise cost allocation. The vendor module stores supplier details and historical price quotes, helping admins quickly identify the most cost-effective option for each material. Purchase orders are tracked from creation through delivery, while costs are automatically aggregated per project for accurate budgeting.

Inventory Management System — PHP, MySQL

- CRUD-based dashboard with admin controls.

AI Workspace — Flutter, Python, PostgreSQL

- Built an AI-powered workspace featuring Ollama-based conversational AI and RAG-enabled document search for contextual knowledge retrieval.

CERTIFICATIONS

- Getting Started with DevOps on AWS
- Published Paper: AI Budget Planner
- Internship at Abhimo Technologies
- Internship at The Website Makers
